MALAYSIA: 22-24 February saw Lighting & Sound Distribution conduct an Arkaos workshop in its Petaling Jaya office premises. About 40 personnel from Rental & AV Staging companies, Clubs, TV Studios as well as local dealers and LED Wall suppliers attended the workshop.

Conducted by Benjamin Bauwens, Sales Manager & Project Coordinator at Arkaos, attendees were introduced to all the Arkaos software product lines such as the Grand VJ, Media Master Express and Media Master Pro, LED Mapper and Video Mapper, which were focussed towards Clubs and permanent installations.

The full range of the Arkaos Servers were also presented at the workshop, which included the Stage Server, Studio Server and Stadium Server, to show the various features of each server and how it was applied with the Video Projectors connected to it, especially the Video Mapper features. The Media Master Pro software was the main feature and the guests were shown the various functions of it and especially the new "Cue Player" features.

Brenda Keung, General Manager, LSD highlighted, "The workshop was meant to refresh the current users and also to introduce to new users the key features of all the Arkaos products on how to enhance and fully utilise the features. As expected there was a lively Q&A segment with many of the current users having many enquiries. It was great as it allowed new users to learn and understand from the questions and answers."

Rental companies such as Tre Bass Entertainment Sdn Bhd (KL), Journal Multimedia Sdn Bhd (KL) & Rumakaya Sdn Bhd (KK) also own the Arkaos servers, amongst others.
